COMPANY PROFILE

Surgiwelt is a dedicated manufacturer specializing in the creation of surgical instruments. With a focus on precision, quality, and innovation.

We provide essential tools for healthcare professionals worldwide. Our products are designed to meet the rigorous demands of modern surgery, ensuring optimal performance and patient safety.

Key areas of expertise:

Manufacturing a wide range of surgical instruments

Commitment to quality and precision

Innovation in surgical instrument design

INDEX

Used for indirect vision, retraction of lips, cheeks, and tongue, and illumination of dark areas.

Double-End

The Calibrated Periodontal probe is an instrument of assessment. It has a rod-shaped working end that is marked in millimeter units. The calibrated probe is actually similar to the ruler. It is used to .. 1. determine the consistency of the gingival tissue. 2. Survey sulcus and pockets depths. 3. Measure clinical attachment levels. 4. Measure the width of attached gingival. 5. Verify whether bleeding and/or purulent exudate is in presence. These probes are made of spring stainless steel.
